

October 2021

## The Great Resignation: The current state of play

of the workforce considering quitting

(Data from Gallup and Microsoft)

**11.5M** workers quit in April, May and June 2021

#### **US Labor Market =**

~152M jobs (Feb 2020)

~147M jobs (Aug 2021)

# Key Outcomes

- 70% of workers want flexible work in some capacity
- Engagement is down; burnout is up
- Small business registrations = 4.3
   million businesses in 2020 (+24%)
- 8.5M Americans are unemployed

# The context for The Great Resignation...

# Though unemployment rates remain high there are labor shortages in many industries

- The lack of talent is driving pay growth
- The working-age population is shrinking as baby boomers retire
- Flexibility and transparency increased during the pandemic and is increasingly important
- The competition for talent is intensifying with workers having confidence in finding a new job to advance their career
- The pandemic has shifted worker views and values; what worked pre-pandemic is no longer working

The Multidimensional Employee Experience

Companies know they need to act but are often unsure of how to do so.

# Where to Begin: Making Informed, Data-Driven Decisions

61%

Senior Executives are turning to

models, analytics or data science tools to make better decisions

#### **Case in Point: Global Technology Company**

Analysis of historical data (client and peers) to understand how rewards and workforce management historically impacted subsequent employee turnover including:

- Employee grade/level
- Manager experience
- Gender and age
- Bonus payouts
- Tenure

#### **Key Recommendations**

Equity pay on a \$ by \$ basis is a more effective retention driver than bonus or base pay

**Biggest turnover risk** is young employees – make sure young employees are quickly integrated

Both promotions and lateral **career opportunities** are effective retention tools

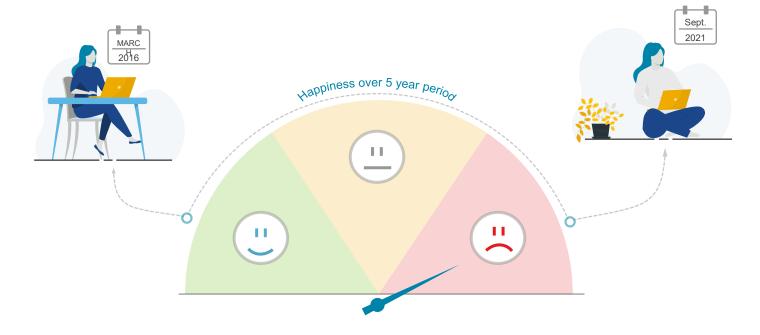

Managers with more **internal tenure** retain their employees better
